

The Town of Florence is seeking:

Motor Equipment Operator

MOTOR EQUIPMENT OPERATOR JOB DESCRIPTION

This role involves operating various types of motorized equipment used in road construction, maintenance, and other public works projects. Responsibilities include performing skilled tasks such as operating trucks, graders, and snow removal equipment, along with conducting minor maintenance like lubrication and fluid level checks.

Work is carried out under general supervision, with room for independent judgment in day-to-day operations. In addition to equipment operation, duties may involve manual tasks such as cleaning culverts, and other road maintenance activities. Minor mechanical repairs may be required.

Key responsibilities of a Motor Equipment Operator in Oneida County include:

Operating various types of motorized equipment:

Includes trucks for hauling materials, snow plows, graders, other construction equipment.

Performing minor mechanical repairs:

Operators may be required to make basic repairs on the equipment they operate.

Maintaining assigned equipment:

Includes cleaning and servicing vehicles and equipment to ensure they are in good working order.

Assisting with other manual tasks:

Operators may be assigned to tasks as cleaning culverts, painting, or other road maintenance.

Following standard procedures:

Work is inspected by supervisors, operators are expected to follow established procedures.

Exercising initiative and judgment:

Operators may be required to determine the nature of repairs needed and develop work methods.

Minimum Qualifications for the Light Motor Equipment Operator:

- One (1) year of automotive equipment operation experience.
- Eligibility for a New York State Commercial Driver's License (CDL).
- Possession of a valid Commercial Driver's License (CDL) at time of appointment.

Additional Notes:

- Specific duties of a Motor Equipment Operator may vary depending on the assignment and the type of equipment operate
